"making milking easier and faster"

2, 3 & 5-Wheel Gate Drives

New Model for 2013

New Pelton Wheel:

- Shaft is supported between bearings giving better bearing life.
- Stronger cast cover.

Simplified Freewheel Clutch:

- Easy lock in lock out operation.
- Lever is less exposed to cow damage.

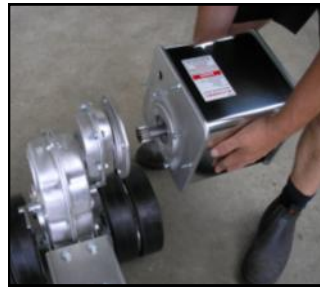

Stronger Chassis:

- Stronger corrosion resistant aluminium side plates.
- Larger mount plate for easier welding to the gate.

No Fuss Motor & Pelton Wheel Removal:

- Motor or pelton wheel can be removed from outside the gear casing.
- Saves time and effort if repairs are needed.

Improved Front Wheel:

- Dry lube front bearings increase life for those who forget to grease them.
- Tapered wheel nuts for better wheel security.

Building on our well proven gate drives, these improvements further enhance their service life and maintainability.
